Summary

Backend Developer with hands-on experience in PHP, Laravel, MySQL, and Python. Skilled in developing backend modules, designing relational databases, and building secure, scalable web applications using MVC architecture. Passionate about backend development, problem-solving, and continuously learning modern technologies.

Skills

Programming Languages: Java, Python, PHP

Backend Technologies: Laravel, RESTful APIs, MVC Architecture

Databases: MySQL, SQL, NoSql

Tools: Git, GitHub, Postman, IntelliJ IDEA

Experience

Backend Developer — Tech Project

Oct 2025 – Present *D.Y. Patil College, Kolhapur*

Tech Stack: Laravel (PHP), MySQL, HTML/CSS

- Built backend modules using Laravel MVC architecture—implemented controllers, models, routing, and validation logic.
- Designed and normalized MySQL schemas; handled relational queries and optimized CRUD operations for performance.
- Developed secure authentication and session handling to support role-based access and workflow control.
- Collaborated with frontend members on requirement mapping, API data flow, and system design decisions.
- Integrated database operations with Laravel Eloquent ORM for clean query management and maintainability.

Projects

FairHire AI: Resume Screening & Assist System | *Python, Machine Learning, NLP, Ollama* Oct 2025 – Nov 2025

- **Built an AI-based resume evaluation system** to score resumes based on domain relevance and extracted skill sets.
- Implemented resume parsing and NLP pipelines to analyze uploaded resumes and identify strengths and improvement areas.
- Developed ML-based scoring logic to generate resume fit scores and selection insights.
- Integrated Ollama LLM to generate resume-based interview questions and personalized improvement recommendations.

SyllabusHub: Study Material Management Platform | *PHP (MVC), MySQL*

Jan 2025 – Mar 2025

- **Developed a centralized academic content platform** to provide students with syllabus, notes, previous-year papers, timetables, and college notices.
- Implemented backend logic using PHP MVC architecture to manage course–semester–subject–material workflows.
- Built secure user authentication and role-based access where admin controls student permissions and content visibility.
- Designed admin modules to upload, update, and delete academic documents with structured validation and error handling.

Awards & Certifications

- **Python for Data Science and AI – Coursera:** Gained hands-on experience in Python programming, data processing, and AI fundamentals.
- **Machine Learning Fundamentals – Online Certification:** Learned supervised learning concepts, model training, and evaluation techniques.
- **PHP with MVC Architecture – Online Course:** Built backend applications using MVC structure, authentication, and database integration.
- **SQL for Backend Development – Online Certification:** Worked on complex queries, joins, and database design concepts.

Education

Master of Computer Applications Pursuing: 2025–2027 *DYP Deemed University / D.Y. Patil College Kolhapur*

Status: Pursuing
